# Zalaib Butt

AI & Machine Learning | GenAI, Model Evaluation, Prompt Engineering | Cyber Security Learner  
Lahore, Punjab, Pakistan

## Summary

I am an aspiring AI & Machine Learning Engineer focused on how intelligent models learn, reason, and solve real-world problems. I enjoy working with neural networks, generative AI, prompting, model evaluation, and continuous experimental improvement. I believe in practical learning — build → iterate → measure → improve — not just theoretical understanding.

I am also independently growing in Cyber Security as a separate track. I like exploring secure system design, vulnerability concepts, and defensive thinking to better understand how modern systems can be hardened and protected.
